

## THE ARIZONA MINING FIELD

Items About the Mines and Mineral Development Culled From Exchanges

### TREASURELAND OF AMERICA

Reports From Many Districts in the Territory, Telling of Important Discoveries, Active Operations and Organization of New Companies

Mr. L. S. Judd, manager of the properties of the Colonial Mining company, near Ehrenberg, was in Yuma last week on business. The Colonial company owns and is developing the only quick-silver mines in Arizona. They are located at Cinnabar, fourteen miles from Ehrenberg. The mines are being operated by the Colonial Mining company which has been carrying on development work on a considerable scale for the past year. The Sentinel says the results have been very gratifying. A double compartment shaft has been sunk to a depth of 180 feet. The ore body extends the width of the shaft (six feet) and how much farther is not yet known, but there is a large body and the ore averages five per cent, pure cinnabar. The company has installed the most modern machinery for economical mining and say that they now have a million dollars worth of ore blocked out.

### YAVAPAI COUNTY

Growing Importance of the Mining Industry. New Developments

George F. Shurtliff, superintendent of the Crown King mines, said last week in an interview: "We have got our new 150 h. p. boiler installed in the mill and are putting in four new Wilfley tables. This will put us in first class shape for a steady winter's run. This new boiler will duplicate the power that is necessary to run the mill, so that there is very little danger from a shutdown for the want of power. The construction work which we have had under way all summer is now about completed, so that we are in shape to go ahead without any further expenditures except the necessary operating expenses. We have the Zika tunnel in about 650 feet and are running it along as fast as we can. We also have found many good prospects while doing annual work on some of our claims, which we intend later to develop on a more extensive scale."

Ore and concentrates are still piling up at Humboldt awaiting treatment when the smelter of the Arizona Smelting company starts up. A gentleman who recently visited Humboldt says there are now piled up there over 50,000 tons of ore and concentrates and the supply is being rapidly increased by the arrival of from two to five cars a day from Middleton, to say nothing of shipments from other quarters.

### CLIFTON AND MORENCI

Items of Interest From Graham County's Big Copper Camps

H. M. Jeter made a trip to Stockton Pass last Saturday to pay off the laborers who are doing the assessment work on the Texas Bell Mining company's claims. Mr. Jeter reports that the workmen have struck still richer ore than heretofore, the ore being a fine free milling quartz.

Dick Marshall is pushing development work on his group of gold claims near Rock House and will soon again be shipping ore. He made a number of shipments from these claims during the past year which averaged \$130 per ton. Several parties have been after these claims, but Dick thinks they are good enough to keep and will develop them himself.

The last shipment of second class ore from the San Jose mine showed a marked increase in silver values. Heretofore the ore averaged an ounce of silver to each average of copper, but the shipment made last week went 18 per cent copper and 36 ounces silver. A shipment of first class ore is now ready which will average 40 per cent copper and 75 ounces in silver. Native silver can be seen in some of the ore.

The most flattering reports continue to arrive from the property of the Crawford Gold Mining company, which is located about seven miles from Metcalf. A strike was made a few weeks ago on the lower level which averaged \$100 a ton in gold. The mine is already sufficiently developed to justify the erection of a plant, but the management will continue development work for probably another year before putting in a plant. Since the company has made such a good showing consid-

erable mining activity has sprung up in that section and it is likely that some other good mines will be found thereabouts.

The Chase Creek company is expanding its territory, having recently purchased three additional claims from A. Lafave, which adjoins the original group, and also half interest in four claims from Walter Doudna, which are located in the gulch above the Rock House and also adjoin the original group. The Chase Creek company now controls about 60 claims in the heart of the mineral belt of the Greenlee district and upon which development work is being pushed.

### MOHAVE COUNTY

This Week's Mining News as Reported by the Miner

It is reported that a big strike of gold ore has been made in the crosscut of the 200 level of the Homestake mine, Silver creek, under bond of Col. Ewing. The mine is one of the big properties of the Silver creek district and has been opened to a considerable extent in the several years just passed by J. R. Holmes, the owner. A tunnel was driven into the vein at a considerable depth and good ore encountered. The shaft sunk by Col. Ewing cuts the vein below the tunnel level. At the old Hardy mine a good strike of ore has been made by the same company. The ore is said to be the best ever encountered in the mine and the body is said to be quite large. Many men are at work on the properties and men are being put on as room is made.

W. E. Frost and others have located an immense vein of copper in the foot hills of the Peacock range, about four miles from Wallapai station. The mine was discovered some months ago by Mr. Frost, but until recently no work was done. A shaft has been sunk to a depth of 10 feet and a cross cut run through the vein for some distance. Samples taken from three feet of the vein give results of over seven per cent copper, with some gold and silver. Other samples were taken from the outcrop that ran from 16 to 23 per cent copper. The mine is in one of the most accessible places in the range and those who have seen it are of the opinion that a wonderful property will be opened up.

The Chloride Gold Mining company is working quite a force of men on the Samoan mine and getting rich ore. At present 100 tons of ore is piled at the Chloride depot awaiting transportation to the Needles smelter. This company under the management of L. Hoffman, has done more to bring Chloride to the front than any of the corporations of that section. The past two years it has kept persistently at work and has demonstrated that the mines do go down by opening up the best body of ore ever found in their property at depth. The company has a fine plant of machinery on the mine and the introduction of air drills has aided materially in the economical handling of the property.

### OUR NEIGHBOR PINAL

Mining News Reported by our Arizona Exchanges

Gen. Manager Gordon, of the Anglo-American Development Co., accompanied by a cousin of the same name, passed through here Saturday en route to San Antonio, Texas, from which point the cousin will proceed to London to complete arrangements for a resumption of operations at the Kelvin mines. Manager Gordon will return to Kelvin this week.

The new pump for the Superior mine arrived this week. It is capable of pumping 500 gallons per minute. This pump, assisted by those now in operation, should solve the water problem at Superior and enable the management to continue sinking in the working shaft without further hindrance from the inflow of water.

While Dr. Jones of Tempe, was in Florence, Tuesday, he informed the Blade that the Fortuna Lead Mining company, whose bond on the Fortuna mine, at Silver King, forfeited some time since, have gotten a new move on and recently made full and final payment for the Fortuna mine. Work at the mine will be resumed at once and continued till the property shall have been fully prosecuted and developed.

The McIntosh leaching plant, at the head of the canal, is now running full time but has not made a "clean-up" yet. Mr. McIntosh was hampered by many long but unavoidable delay while constructing this experimental plant. He never lost courage, however, and overcame one obstacle after another. He has earned and deserves success and the Blade is pleased to learn that he has finally triumphed.

Wednesday, President F. P. Jeffries vice-President W. H. Shackleton and Geo. Shackleton, Hugh Shirkie, Edward Shirkie, J. Woolley and Jas. McClelland, all of the Arizona-Pacific Copper company, arrived at the Phoenix & Eastern depot, at Florence. Manager Sharpe, of Florence, met the party at the depot and accompanied them to Woolley, where they will inspect the company's property. The shaft is now nearing the 500-foot station from which point a cross-cut will be made to the vein. This work will demonstrate the value of the property as a future producer.

### PIMA COUNTY STRIKES

Recent Reports Indicate Coming Prosperity in the District

From the Tucson Citizen.  
Superintendent F. A. Close, of the Helvetia mine, stated that ore has been found in the Isle Royal shaft at a depth of 700 feet. The ore was struck last week. The other shaft which the company is working is the Old Dick shaft and is only 175 feet deep. The smelter at Helvetia will be started January 1. There is enough ore in sight to keep it going continually. The capacity of the smelter has been increased from 150 to 250 tons. The force of miners is being increased right along and Helvetia is growing into a big mining camp. About \$1,000,000 has been invested in these mines and big returns are expected shortly.

From the Florence Blade.  
A telephone message informs the Blade that water has been encountered at a depth of 250 feet in the Weedon shaft on the property of the Mineral Hill Consolidated Copper company in Pima county, of which company the editor of the Blade is the consulting and directing engineer. The same round of shots that revealed the water also broke into another large body of sulphide ore. This is another instance in which the editor of the Blade has "won out" against a bevy of the "yaller legged" gentlemen who are long on theory and short on horse sense and practical experience.

From the Bisbee Review.  
John Westledge has just returned from the Rincon mountains where he is interested in extensive mining properties. He has samples of ore at L. C. Shattuck's which would be of interest to any genuine mining man. These samples run as high as 60 per cent in copper and in many instances carry high values in the form of blue bromide of silver. The property from which the samples were taken, which consists of 17 claims owned by Louis Basalia and other gentlemen in the Rincon district about 28 miles northwest of Benson. From all reports and from an examination from a multitude of samples brought from that district, it must be one of exceptional interest.

### COCHISE COUNTY

Where Mining, the Chief Industry, is Very Active

From the Tombstone Prospector.

Another company has begun operations in the Tombstone district and will doubtless be numbered among the early producers of the camp. The Cochise Gold & Silver company has a very valuable group of mines near the State of Maine and in the heart of a richly mineralized section upon which work has been ordered started and will soon be well under headway. This company is a recent organization composed of Pittsburg and eastern stockholders of which J. M. Montgomery, of Pittsburg, is president. Mr. Montgomery was formerly interested in the Vizna and Sterling Silver company in this district, while J. S. Brooks of the Marine National Bank, of Pittsburg, is also interested in mines in Arizona. H. T. Fisher, who is one of the pioneer mining superintendents in this district, and an acknowledged authority on the ores and formations of Tombstone, is in charge as manager.

Beer with snap, sparkle and life—retaining all the richness of the imported Bohemian hops and goodness of the finest barley, eight months of ageing—the natural color of the product—scientific cleanliness and perfect purity make A. B. C. Bohemian bottled beer deliciously good. Order from Van Slyck & Meyers, wholesale dealers, Globe, Arizona.

### NOTICE OF POSTING

In the Probate Court, County of Gila, Territory of Arizona.  
Notice is hereby given that J. E. Crawford, administrator having filed in this court a return of sale of real estate of the estate of James W. Broderick, deceased the hearing of the same has been fixed by the said court for Monday, the 4th day of December, 1905, at 10 o'clock in the forenoon of said day, at the courtroom thereof, at Globe, in the county of Gila; and all persons interested in the said estate are notified then and there to appear and show cause, if any there be, why the said sale should not be confirmed. The property sold is lot 4, in lot 2, of section 26, in North Globe township. Consideration \$600.

P. C. ROBERTSON, Clerk.

Dated November 22, 1905. 2t

### LODGES AND SOCIETIES

Pinal Mountain Lodge, No. 11, Knights of Pythias

Meets regularly every Thursday evening in the I. O. O. F. Hall. Visiting knights in good standing cordially invited.  
D. S. TOVEY, C. C.  
R. H. OLLSON, K. of R. & S.

F. & A. M.  
Regular meetings of White Mountain lodge, No. 3, will be held the first Tuesday of each month in Odd Fellows' building.  
LEROY MIDDLETON, W. M.  
G. W. SHUTE, Secretary.

Globe Chapter No. 7, R. A. M.  
Regular convocations of Globe Chapter, No. 7, R. A. M., fourth Friday evening in each month; from May to October, 8 p.m., from October to May, 7:30 p.m. Visiting companions cordially invited.  
ALONZO BAILEY, H. P.  
W. D. FISK, Secretary.

B. P. O. E.  
Globe lodge, No. 489, B. P. O. E., meets on the first and third Fridays in each month, in Odd Fellows' hall. Visiting Elks are cordially invited.  
E. T. STEWART, E. R.  
J. G. OLDFIELD, Secretary.

A. O. U. W.  
Globe lodge, No. 15, meets on the first and third Wednesdays of each month at 8 p.m., in Miners' Union hall. Visiting brothers in good standing are cordially invited.  
D. S. HERON, W. M.  
L. N. MARK, Recorder.

I. O. O. F.  
Rescue lodge, No. 12 meets every Wednesday evening. Visiting brothers are cordially invited.  
DAN R. WILLIAMSON, N. G.  
EUGENE MIDDLETON, Secretary.
